Versions/assembling:

Construction:

The unit consists of a body. A shade is mounted to the luminaire body with a ring. A disk separating the electrical compartment from the lighting compartment is attached to a luminaire ring. An LED light source radiator is settled to the disk. LED modules are mounted to the radiator with a set of lenses by screws. The modules are powered with a power supply. The luminaire is sealed with a gasket. As an option, we equip the luminaire with a ZHAGA socket.

Mounting instructions:

- Screw the LED light sources with lenses and radiator to the disk.
- Connect the electrical cables according to the scheme.
- Mount the shade to the ring with gasket.
- Attach the disc to the ring and secure its position.
- Close the housing and secure it with a clip
- The luminaire is mounted to the lantern with an M20 thread (hanged luminaire).

Electrical diagrams:
